Art Unit: 1712

DETAILED ACTION

Page 2

Claim Objections

1. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 2 teaches C1 to C8 esters of the fatty acids, while parent claim 1 is limited to C1 to C4 esters of these fatty acids.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 6-8 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear if the lower alkyl glycol ether of claim 1, also satisfies the requirements of the compounds taught in claims 6 and 11, and those dependent therefrom, and thus a single compound, instead of 2 or more compounds may satisfy the teachings of claims 6-8 and 11.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Application/Control Number: 10/643,289

Art Unit: 1712

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,630,428. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the present claims differ in teaching the use of C4-C22 fatty acids, the soya or canola acids of the claims of US 6,630,428 are encompassed within such C4-C22 fatty acids, and would render the present claims obvious to one of ordinary skill in the art.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 1-6 and 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Good (5877133).

Application/Control Number: 10/643,289

Art Unit: 1712

Good teaches a cleaning composition which comprises a lower alkyl ester of a fatty acid, and which preferably comprises a glycol ether as a coupling agent (see abstract and column 4, lines 43-47). Good also teaches the use of polyalkylene glycol ethers within the scope of the invention as nonionic surfactants (column 3, lines 51-59), and antioxidants (column 5, lines 33-35). Terpene alcohols may also be included as in claim 9. The use of the term up to is also inclusive of 0% in claims 9 and 10. Good differs from the present invention in that a specific example of a composition which comprises the ester in the range of 40 to 99% is not disclosed. However, Good teaches that the compositions comprising the ester to combination of coupling agent and surfactant may be at a ratio as high as 2:1, wherein water is only optionally added (column 5, lines 16-26 and claim 9). It would be obvious to one of ordinary skill in the art to utilize cleaning compositions of Good comprising up to 66.66% ester, given the teaching of Good that the ester to combination of coupling agent and surfactant may be as high as 2:1. It would further be obvious to one of ordinary skill in the art to utilize levels of the glycol ether coupling agent in the range of greater than 20% up to 25%, given that the combination of surfactant and coupling agent is taught to total around 33.33%. Applicants parent application 08/538,262 only provides support for the glycol ether up to 20%, thus Good qualifies as prior art against the current claims. Applicant's intended use in wells or on well equipment does not distinguish over the prior art.
